SUMMARY

Results-driven MERN Stack Developer with hands-on experience designing and deploying full-stack web applications using MongoDB, Express.js, React, and Node.js. Adept at building scalable RESTful APIs, implementing JWT-based authentication, and delivering responsive UIs. Familiar with Agile workflows, Git-based collaboration, and CI/CD deployment via Vercel and Netlify. Passionate about clean code and performance optimization — seeking a full-time role to build impactful products within a forward-thinking team.

TECHNICAL SKILLS

Languages: HTML5, CSS3, JavaScript (ES6+), TypeScript (basic), python (basic)

Frontend: React.js, Redux, Tailwind CSS, Bootstrap, Responsive Web Design

Backend: Node.js, Express.js, RESTful API Development, JWT Authentication, MVC Architecture

Database: MongoDB, Mongoose, CRUD Operations, Data Modelling

Tools & DevOps: Git, GitHub, Postman, Vercel, Netlify, Figma, VS Code, npm

Practices: Agile/Scrum, CI/CD (Vercel/Netlify), API Testing, Version Control, Component-Driven Development

EXPERIENCE

MERN Stack Developer Trainee

May 2025 – Dec 2025

Luminar Technolab, Kochi, Kerala

- Engineered 3+ full-stack web applications using React.js, Node.js, Express.js, and MongoDB, delivering all projects on schedule.
- Designed and integrated 15+ RESTful API endpoints with JWT-based authentication, ensuring secure and role-based access control.
- Built reusable React component libraries with Redux state management, reducing UI development time by ~30% across projects.
- Optimized MongoDB queries and Mongoose schemas, improving average API response time by ~25% in data-heavy modules.
- Followed Agile/Scrum workflows with weekly sprints; managed codebase via Git with structured branching strategies on GitHub.
- Deployed all applications via CI/CD pipelines on Vercel and Netlify, achieving zero-downtime releases throughout training.

PROJECTS

Aqua Store E-commerce – MERN Stack

- Developed a full-stack e-commerce platform for aquarium fish and accessories with product browsing, shopping cart, order management, and responsive user interface.
- Integrated Clerk Authentication with role-based access control, providing secure sign-in/sign-up and separate Admin and Customer dashboards.
- Built scalable RESTful APIs using Express.js and MongoDB, integrated Stripe for online payments, and Cloudinary for product image management.
- Live:** [link](#) **GitHub:** [link](#)

Employee Management System – MERN Stack

- Architected a role-based access control (RBAC) system with Admin and Employee dashboards managing 5+ permission levels.
- Implemented attendance tracking, leave management, and payslip generation — reducing estimated manual HR effort by 40%.
- Built 20+ REST API endpoints; structured MongoDB collections with Mongoose schemas optimized for relational data queries.
- Live:** [link](#) **GitHub:** [link](#)

Blog Website – MERN Stack

- Built a full-stack blog platform with JWT authentication supporting user registration, login, and role-based post management (CRUD).
- Developed 10+ RESTful API endpoints with Express.js; used MongoDB aggregation for efficient content filtering and retrieval.
- Delivered fully responsive UI across mobile and desktop using React.js and Tailwind CSS with a component-driven architecture.

EDUCATION

Bachelor of Commerce (Computer Applications)

2025

Mar Gregorios Abdul Jaleel Arts & Science College, North Paravur, Kerala

- Mahatma Gandhi University — Graduated with a specialization in Computer Applications.
